Roofing Division

DDI has the experience, resources, and safety record to provide our customers with a turn-key project that is second to none. Whether you are in need of repairs, have a new or existing building, our team will work with you to customize a roofing system that is best for your structure & its geographical location. Listed below are some of the products our team has worked extensively with:

- Asphalt Shingles
- Metal Roofing
- (BUR) Built up Roofing
- Thermoplastic Membrane (TPO/PVC)
- Thermoset (EPDM)
- Modified Bitumen (Torch Down)
- Spray Applied Roof Coatings

Safety

Safety is a top priority, and our employees go the extra mile to do whatever it takes to continually achieve and sustain an outstanding safety record. Our safety culture starts with the DDI Southeast leadership and is executed by our qualified Safety Officers. Our safety team is experienced, well-trained and equipped with the resources to effectively administer all safety procedures.

Project Managers and Superintendents play a crucial role in the advancement of our safety procedures. Field supervisory personnel set the tone for safety at jobsites and understand their critical role in delivering safety messages to each worker. Field employees communicate safety concerns and lend their experience to daily safety plan procedures.

Safety is every employee's responsibility, every job, every time.
